## MISCELLANY.

FIRST IMPRESSIONS, OR NOTES BY THE WAY.  
BY NATHANIEL P. WILLIS.

Gallipoli—aristocracy of beards—Turkish shopkeepers—the hospitable Jew and his lovely daughter—unexpected reconnoitre—Constantinople—the Bosphorus, the Seraglio and the Golden Horn.

What an image of life it is! The good ship dashes bravely on her course—the spray flies from her prows—her sheets are steady and full—to look up to her spreading canvas, and feel her springing away beneath, you would not give her “for the best horse the sun has in his stable.” The next moment, hey! the fore-sail is aback! the wind baffles and dies, the ripples sink from the sea, the ship loses her “way,” and the pennant drops to the mast in a breathless calm! “Clear away the anchor!” and here we are till this “crab in the descendant” that makes “all our affairs go backward,” yields to our better stars.

We went ashore to take a stroll through the streets of Gallipoli, (the ancient Gallipolis of Thrace) as a sop to our patience. A deeply-laden Spanish merchant lay off the pier, with a crew of red-capped and olive-complexioned fellows taking in grain from a Turkish caïque, and a crowd of modern Thracians, in the noble costumes and flowing beards of the country, closed around us as we stepped from the boat.

A street of *cafes* led from the end of the pier, and as usual, they were all crowded with Turks, leaning forward over their slippers, and crossing their long chibouques as they conversed together. It is odd that even the habit of a life can make their painful and unnatural posture an agreeable one. Yet they will sit with their legs crooked under them, in a way that strains the unaccustomed knees till it cracks again, motionless by the hour together.

I had no idea till I came to Turkey how rare a beauty is a handsome beard. Here no man shaves, and there is as great a difference in beards as in stature.—The men of rank that we have seen, might have been picked out anywhere by their superior beauty in this respect. It grows vilely, it seems to me, on scoundrels. The beggars ashore, the low Jews who board us with provisions, the greater part of the soldiers and petty shopkeepers of the towns, have all some mark in their beards that nature never intended them for gentlemen. Your smooth chin is a great leveller, trust me!

These Turkish towns have a queer look altogether.—Gallipoli is so seldom touched by a Christian foot, that it preserves all its peculiarities entire, and is likely to do so for the next century. We walked on, ascending a narrow street, completely shut in by the roofs of the low houses meeting above. There are no carriages or carts, and the Turks glide over the stones in their loose slippers with an indolent shuffle that seems rather to add to the silence. You hear no voice, for they seldom speak, and never above the key of a bassoon—and what with the odd costumes, long beards, grave faces, and twilight darkness all about you, it is like a scene on the stage when the lights are lowered in some incantation scene.

Each street is devoted to some one trade. We first got among the grocers. Every shop was a fellow to the other, containing an old Turk squatting among soap, jars of oil, raisins, olives, pickled fish and sweetmeats, and every thing within his reach. He would sell you his whole stock in trade without taking his pipe from his mouth, or disturbing his yellow slipper.

The next turn brought us into the Jews’ quarters.—They were all tailors, and their shops were as dark as Erebus. The light crept through the chinks in the roof, falling invariably on the same aquiline nose and rugged beard, with now and then a pair of copper spectacles, while in the back of the dim tenement sat an old woman with a group of handsome little Hebrews, (they are always handsome when very young, with their clear skins and dark eyes,) the whole family stitching away most diligently. It was laughable to see how every shop in the street presented the same picture.

We then got among the slipper makers, and vile work they turned out. We were hesitating between two turnings, when an old Jew, with a high lambs-wool cap and long black caftan, rather shabby for wear, addressed me in a sort of *lingua franca*, half Italian, half French, with a sprinkling of Spanish, and inquiring whether I belonged to the frigate in the harbor, offered to supply us with provisions, etc. etc. I declined his services, and he asked us directly to his house to take coffee, as plump a *non sequitur* as I have met in my travels.

We followed the old man to a very secluded part of the town, stopping a moment by the way to look at the remains of an old fort built by the Genoese in the stout times of Andrea Doria. (Where be their galleys now?) Hajji (so he was called, he said, from having been to Jerusalem) stopped at last at the door of a shabby house, and throwing it open with a hospitable smile, bade us welcome. We mounted a creaking stair, and found things within better than the promise of the exterior.—One half the floor of the room was raised perhaps a foot, and matted neatly, and a nicely carpeted and cushioned divan ran round the three sides, closed at the two extremities by a lattice work like the arm of a sofa. The windows were set in fantastical arabesque frames, the upper panes coarsely colored, but with a rich effect, and the view hence stretched over the Hellenespont towards the south, with a delicious back ground of the valleys about Lampsacus. No palace windows looks on a fairer scene. The broad strait was as smooth as the amber of the old Hebrew’s pipe, and the vines that furnished Themistocles with wine during his exile in Persia, looked as golden a green in the light of the sunset, as if the honor of the tribute still warmed their elastic juices.

The rich Turkish coffee was brought in by an old woman, who left her slippers below as she stepped upon the mat, and our host followed with chibouques and a renewed welcome. A bright pair of eyes had been peeping for some time from one of the chambers, and with Hajji’s permission I called out a graceful creature of fourteen, with a shape like a Grecian Cupid, and a timid sweetness of expression that might have descended to her from the gentle Ruth of scripture. There are lovely beings all over the world. It were a desert else. But I did not think to find such a diamond in a Hebrew’s bosom. I have forgotten to mention her hair, which was very remarkable. I thought at first it was dyed with henna. It covered her back and shoulders in the greatest profusion, braided near the head, and floating below in glossy and silken curls of a richness you would deny nature had you seen it in a painting. The color was of a deep burnt brown of a berry, almost black in the shade, but catching the light at every motion like threads of gold. In my life I have seen nothing so beautiful. It was the “hair lustrous and smiling” of quaint old Burton.\* There was something in it that you could scarce avoid associating with the character of the wearer—as if it stole its softness from some inborn gentleness in her heart. I shall never thread my fingers through such locks again!

We shook our kind host by the hand, and stepped

gingerly down in the fading twilight to our boat. As we were crossing an open space between the bazzaars, two gentlemen in a costume half European half Oriental, with spurs and pistols, and a quantity of dust on their moustaches, passed, and immediately turned and called me by name. The last place in which I should have looked for acquaintances would be Gallipoli. They were two French exquisites whom I had known at Rome, travelling to Constantinople with no more serious object, I dare be sworn, than to return with long beards from the east. They had just arrived on horseback, and were looking for a khan. I commanded them to my old friend the Jew, who offered at once to lodge them at his house, and we parted in this by-corner of Thrace, as if we had but met for the second time in morning strol to St Peter’s.

Gallipoli is so seldom touched by a Christian foot, that it preserves all its peculiarities entire, and is likely to do so for the next century. We walked on, ascending a narrow street, completely shut in by the roofs of the low houses meeting above. There are no carriages or carts, and the Turks glide over the stones in their loose slippers with an indolent shuffle that seems rather to add to the silence. You hear no voice, for they seldom speak, and never above the key of a bassoon—and what with the odd costumes, long beards, grave faces, and twilight darkness all about you, it is like a scene on the stage when the lights are lowered in some incantation scene.

As the distance lessened, the tall, slender glittering minaret of a hundred mosques were first distinguishable. Towers, domes and dark spots of cypresses next emerging to the eye, and a sea of buildings, followed undulating in many swells and widening along the line of the sea as we were approaching a continent covered to its farthest limits with one unbroken city.

We kept on with unslackened sail to the shore which seemed closed before us. A few minutes opened to us a curving bay, winding in and lost to the eye behind a swelling eminence, and as if mosques, towers and palaces had spread away and opened to receive us into their bosom, we shot into the heart of a busy city, and dropped anchor at the feet of a cluster of hills, studded from base to summit with buildings of indescribable splendour.

An American gentleman had joined us in the Dardanelles, and stood with us, looking at the transcendent panorama. “What is this lovely point, gemmed with gardens and fantastic palaces, and with every variety of tree and building on its gentle slope descending so gracefully to the sea?” The *Seraglio*! “What is this opening of a bright water, crowded with shipping, and sprinkled with these fairy boats so gaily decked and so slender, shooting from side to side like the crossing flight of a thousand arrows?” The *Golden Horn*, that winds up through the city and terminated in the valley of Sweet Waters! “And what is this other stream, opening into the hills to the east, and leading in many swells and widening along the line of the sea as we were approaching a continent covered to its farthest limits with one unbroken city.

THURSDAY, SEPTEMBER 18, 1834.

**AN ACT, to change the name of the parties there mentioned.**—WHEREAS, numerous petitions have been presented to this Legislative body, from that powerful and wealthy political party, the OLD TORIES, alias Royalists, alias Federalists, alias Hartford Conventionists, alias National Republicans, alias Consolidationists, alias Bankites, &c., &c., &c., respectfully representing, that all the aforesaid names have successively become odious, unpopular, and degrading in the view of the common people, and that they cannot hope to regain power and office while they are known and called by the names aforesaid:—And whereas, they have also represented, that being partial to a monarchical form of government, and particularly to that of England, our beloved mother country, to whom filial obedience is due, and with whom they are, and long have been, desirous that these revolted States should again become united as Colonies, they therefore wish to be known by a name by which some political party in the mother country has been designated; and as the appellation *Tory*, which would be most appropriate to their principles, and most grateful to their feelings, has always been unpopular in this country, while that of *Whig* has, on the contrary, met with popular favor:—Therefore, and in consideration of the premises—

**Be it enacted, &c.,** That the said OLD TORIES, alias Royalists, alias Federalists, alias Hartford Conventionists, alias National Republicans, alias Consolidationists, alias Bankites, &c., &c., &c., shall be allowed to take and use the name of WHIGS, alias WIGS, and to be known by that name in future, or until the said name shall become, from their use of it, odious and unpopular:—Therefore, and in consideration of the premises—

**Provided nevertheless,** That all the Republicans, and other good people of this Commonwealth, shall have full liberty and permission to call the said Whigs, alias Wigs, by any of the aforesaid names which they have heretofore borne, at all times, and in all places:—and, moreover, that the said Whigs, alias Wigs, shall still be, and shall forever continue to be, responsible for all the acts, contrivances, plots, treasons, conspiracies, misdemeanors, wicked designs, and traitorous intentions, in which they have, at any time, been detected or implicated, under any of their said former names and appellations, in the same manner, and to the same extent, as if this Act had never been passed.

[Approved, April 1, 1834.]

It seems to us, that these circumstances, (the returns of the elections,) though they do not warrant us in claiming a victory in Maine, afford a strong assurance, that victory is not far distant. The Jackson domination in that State for some years past has been so complete, that it is not surprising, that it should not be thrown off by a single effort, however vigorous. It is very plain, nevertheless, that the influence of that domination is yielding, and that the same change, which has been going on elsewhere, is rapidly in progress there; and the result which has been already exhibited, besides affording a gratifying contrast with the past, gives occasion to the most encouraging hopes for the future.—*Daily Advertiser.*

We are happy to find that the “respectable Daily” has ascertained, to its entire satisfaction, that the federalists have not gained a victory in Maine. Many of its contemporaries are not blessed with so keen a vision, and are still claiming a victory, without stopping for a moment to consider the requisites necessary to form one. When the Daily shall have found time to look farther into the subject, it will hardly insult the common sense of its readers by asserting that “victory is not far distant”—for a little fair investigation cannot fail to convince that paper, (as it has already, the public generally) that there is not the least possible chance for a federal victory in Maine for many years to come. That party can never come into the field under more favorable circumstances than it did at the last election; and we are sure its members can never make more active exertions than were witnessed upon that occasion. They could not be punished criminally, and the only way to teach them a lesson was to give a good dead.

We understand that Mr Ronaldson and his wife were from Leith, in Scotland, or the neighborhood of that town. A brother of Mr R. is supposed to reside at Bytown, on the Ottawa—another at Philadelphia—and he had himself lately returned from Van Dieman's land. They had with them all their family, and a respectable young servant woman, Grace Purvis. We fear that there is but little expectation that the two children will recover. The bodies were shockingly scalded, and could not be recognised.

The “Spirited Resolutions” passed by the opponents of the administration at Marblehead, were presented to the meeting by an individual who was some years ago returned as a member of our House of Representatives—his right to a seat there was disputed, upon the allegation that he was an officer of the U. S. Customs—this he positively denied, whereupon a Custom House paper was produced, bearing his signature as Deputy Collector of Marblehead, and the gentleman was obliged to yield his seat.

**Mr Thurston,** the gentleman arrested in this city on Tuesday, on suspicion of having participated in the Convent riot, is not a “machinist,” as stated by us yesterday, but a merchant, of the firm of Thurston & Bird, Central street. A good deal of excitement exists in relation to his arrest, and it is generally believed that he is entirely innocent of the crime charged upon him.—The offence not being bailable, he will be forced to remain in jail for a considerable time.

The Boston and Worcester Railroad will be opened to Hopkinton on Saturday next, upon which occasion, the Directors and a few invited guests will partake of a collation at the Unionville Temperance Hotel, which will be opened on that day, by Capt J. Stone.—A caution, in the shape and form of a guide board, admonishing travellers to beware of the engine, is about to be erected at Newton, where the accident recently happened to Mr Hurd.

**Walton,** after his escape from the State Prison, on the morning of Sunday last, entered through a window a house in Southack street, which had been occupied previous to his arrest, by one Henry Mace, and since by a family of blacks. As soon as he discovered the change of occupants, he made his escape, and has not been heard of since.—*Mech. R. R. Bulletin.*

The individual who has been promising the citizens of Norfolk, Va., for some time, that he would make a balloon ascension, has evaporated, leaving his bills unpaid, and the curiosity of the good people ungratified.

The Hon. Mahlon Dickerson, Secretary of the Navy, and Messrs Ewing and Tyler, of the U. S. Senate, arrived in Philadelphia on Saturday morning.

The National Intelligencer of Saturday says—“First white frost in this vicinity yesterday morning.”

Samuel Lee declines being a candidate for State Senator from Worcester County.

## POLICE COURT.

**Bursters vs. Watchmen.**—As we take the liberty of rapping some of the Charles over the knuckles once in a while, for swearing wide, it is but justice to them to notice, when the battery of falsehood is turned against them. A few days ago Cornelius O'Connor, backed by a willing witness, entered a complaint against Samuel Bowden, watchman, for an assault. The witness and O'Connor both swore, that the latter was sitting peacefully on a door step in Ann street, when Bowden passed by, swearing about Irishmen, which indeed O'Connor observed that “Irishmen were as good as any other people, if they behaved themselves.” This, according to the likely couple's swearing, irritated Bowden, who gave O'Connor a blow with the watch-hook, and continued beating him till he deposited him in the watch-house, whether O'Connor himself insisted upon being carried, in order that he might have justice done him. Morris, another watchman, was also charged with assisting Bowden, in his assault on the complainant. Such being the apparent naked facts of the case, solemnly sworn to, no hesitation was felt by the Court in granting a warrant; but it turned out upon the examination, that O'Connor, who is a professed pugilist, had been engaged in a fight in the early part of the evening, which had been quelled by Bowden and Morris; that when O'Connor, while sitting on the step, addressed himself to Bowden, the latter advised him to go home, instead of which, however, he squared off, and dared him to fight, and was only brought to by a rap with the hook on his fist, which he had doubled up in Bowden's face.

It came out on the cross-examination, that the volunteer witness had been complained of by Bowden and Morris to the City Marshal, for keeping a victualling cellar open, at unlawful hours; but whether that trifling circumstance induced him to make such gross mistakes in testifying, as he did, was only a matter of inference. Bowden was, of course, acquitted.

**A Fatal and Distressing Steamboat Accident** is thus described in the Quebec Gazette of the 8th inst:—

**Six lives lost by the partial explosion of a Steamer's boiler.**—The first fatal accident of this kind, since the introduction of steamers on the St Lawrence, in 1811—twenty-three years ago—unfortunately occurred on Sunday, 7th inst., about 4 o'clock, A. M., on board of the steamer *Lady of the Lake*, Captain Nickless. The vessel was just leaving the Queen's wharf for Montreal, had cast off all her moorings but one when the explosion took place, and was heard by some of the persons on deck to make a noise like the discharge of a musket. The party exposed to the steam which escaped, occupied a middle cabin, at 12s. 6d. a-head, and, like many of the passengers that trip, had slept on board. They were, at the time of the accident, all in bed, with the key of the door turned, by which the steam was unable to escape.

Two inquests were held on the bodies of the unfortunate individuals. They were in easy circumstances, and came in the Conference, from Leith, sent back to the quarantine station, and detained for near a month. There were eight individuals in the cabin at the time of the explosion, six of whom died. The two survivors, Jane Ronaldson, aged 2 years, and Robert Ronaldson, aged 7 weeks, are still in a very dangerous state. The first inquest was held on the bodies of William Ronaldson, aged 29 years—Ellen Ronaldson, aged 29 years, Ellen Ronaldson, aged 6 years, Archibald Ronaldson, aged 4 years, Thomas Moffat, aged 4 months, who all died in less than 24 hours after the accident. The next inquest was upon the body of Grace Purvis, aged 20 years, who expired this morning. The Coroner said it was very evident that there was no criminality on the part of any one, but there was gross negligence on the part of the captain and engineer. The only way to punish them was by a deadhead, which plan is followed in England in case of negligence of this kind. They could not be punished criminally, and the only way to teach them a lesson was to give a good dead.

A gentleman who had been unperceived, a witness to the whole transaction, put a sixpence between his fingers and thumb, and beckoned this little monarch of May-day to an opposite door; the lad grinned at the silver, but on stretching out his hand to receive it, the teacher of humanity gave him such a rap on the knuckles with a cane, as made him ring his hand with pain, and tears running down his cheeks, he asked what it was for?—“To make you feel,” was the reply. “How do you like a blow and a disappointment?” The dog endured both! Had you given him a piece of bread, this sixpence should have been the reward; you gave him a blow, and therefore I put the money in my pocket.”

**Ballooning.**—We perceive by the National Gazette, that Mr Ash is about to make an ascension from Philadelphia in a balloon filled with hydrogen gas made from zinc, which is twelve times lighter than common air, while that made from iron is only seven times lighter. The ascending power thus gained will enable the aeronaut to reach a greater height than has yet been reached—and we rejoice to learn that Mr Ash will be prepared to make experiments which will be extremely interesting to the scientific portion of the community.—His balloon is made of 517 yards of silk carefully varnished—the diameter is 25, and its contents more than 11,000 cubic feet. If the wind should proveランド, the Aeronaut proposes to travel to a great distance, and will descend at night and anchor, and ascend in the morning, and close his adventures, if possible on the verge of civilization. This contemplated voyage of Mr Ash promises to be one of the most interesting as well as useful ever undertaken; and what will the sons of the forest say when they behold the huge machine soaring in the air above them?—*Mer. The brig Margaret, sailed from Portland on Wednesday last for Savannah, having on board a party of “industrious Yankees,” who intend pursuing lumbering operations on the Little Ocmulgee river, in the State of Georgia. A large tract of land it appears has been purchased by a company at Portland. The timber is principally long leaved yellow pine, which produces durable and excellent lumber. The company, says the Advertiser, intend to operate by northern labor and to keep a constant supply of every species of lumber at Darien, near the mouth of the Altamaha.

The Altamaha, something over 100 miles from its mouth, divides into two large branches, which are named the Ocmulgee and Oconee rivers, upon the latter is situated Milledgeville, the capital of the State, and upon the other, equally distant from the junction, the flourishing town of Macon. Between these large rivers, within the limits of steam boat navigation, within 50 miles of the capital, and in the very centre of the State, lies the tract of 700,000 acres, purchased by the company whose enterprise we are noticing. We wish success and prosperity to their undertaking.—*N. Y. Eve. Post.*

**BOSTON ACADEMY OF MUSIC ORATO-**  
RIO.—An Oratorio will be given by the Choir of the Boston Academy of Music, on **THIS EVENING**, Sept. 18th, in the Church in Bowdoin street.

The Dirge, Requiem and Ode, prepared for the occasion of the Eulogy on the death of Lafayette, in Faneuil Hall, Sept. 6, will be repeated; in addition to which a selection of pieces from the works of distinguished English and German composers, will be performed.

**PART I.**

1. Dirge, as performed at Faneuil Hall on the 6th inst.: "Weep, Columbia, weep." Handel.

2. Requiem, by Grenville Mellen, as performed at Faneuil Hall on the 6th inst.: "Breathe mournful music round."

3. Ode, by L. McLellan, Jr., as performed at Faneuil Hall on the 6th inst.: "Lord, or tender mercies sake."

This Chorus is in the true style of Cathedral music, and is quoted by Dr Crotch in his "Speech" as perfect in its kind.

5. Quartette, from the Oratorio of "Joseph," composed by Mehl: "Bliss who with generous pity glows."

6. Chorus: "Gloria in excelsis, from Mozart's 12th Mass, adapted to English words." Mozart.

**PART II.**

1. Opening Chorus, from the celebrated "Te Deum," by Gramm: "To Deum laudamus."

2. Semi-Chorus, from the same, "Tu ad dexteram Patris," Gramm.

3. Chorus from the Oratorio of Judith, by Wm. Gardiner: "The arm of the Lord is upon them—Haydn."

4. Duet—God is Love.

5. Semi-Chorus in two parts, from a Mass, by Naumann: "Quoniam solus sanctus."

6. Chorus, from the Oratorio of the Death of Abel, composed by G. Perry: "Blessed is the man."

7. Solo and Distant Chorus—Italian Herdsman's Evening Song.

"Gloria in Excelsis," from Haydn's 1st Mass, adapted to English words: Haydn.

**A. WATKINS, THOMSONIAN BOTANIC PHYSIC.**—*13 Cornhill, Harvard street, opposite the Bank of Boston.*—Has been acquainted with and possessed of a right to use Dr. Samuel Thomson's Patent Vegetable Medicine, for the last 21 years, and administered them in Europe, and South and North America, (including the West India Islands) and with as much success as any other can, with trifling boast of it. In the nine months' practice he has had at the Harvard street, *Infrared*, he *has not had the misfortune to encounter* any disease among his patients which they had been for years in the hands of the members of the Medical Faculty, and some of them abandoned to their (supposed) hopelessness. As it is so well known in Boston, it is unnecessary to enter very largely into a detail of success. The following are a few of his patients:—

Stephen Gore, (inquire at Thomas Holland's Beach street, Boston,) totally blind for about 5 months, one eye, nearly destroyed, general debility, legs swollen and lame—appeared completely changed with poisons. General health restored; eye sight greatly improved; see to read (without glasses) in 5 courses, &c.

Mr. Parker, now assistant at the Intermittent, rheumatism and dyspepsia, cured in 3 cases.

Francis Kemlo, 153 Court street, Boston, severe indigestion and spasms, cured in 4 courses, &c.

Thomas Pierson, of Roxbury, and keeps a stall in the new Market, Boston,) erysipelas in the face and one eye; leg very much swollen and ulcerated from the knee to the ankle for the last 25 years—attended by many physicians; nearly cured in 5 weeks.

Miss Charlotte Pierson, do. white swelling, with loss of appetite, and medical treatment 5 months, and unable to walk—cured in 3 weeks.

Joseph Brown, baker, of Roxbury, rheumatic and retrocedent gout; stomach, knees, ankles and toes greatly affected; has been confined to bed nine weeks—cured in 4 courses, &c.

Samuel Hayes, of Weymouth, rheumatism in the back, strictures in the urinary passage, general emaciation, &c.—cured in 6 courses, &c.

S. Smith, calico printer, of Lynn, pain in the stomach and back, and strictures across the breast, &c.—cured in 2 courses.

Toll, of Shepard street, Lynn, fits and severe cholic, from indigestion—cured in 2 days!

Benj. Morgan, of Salem, cancerous or scrofulous humors, hand ulcerated, debility and loss of flesh; piles severe, and unable to support himself for a considerable time—cured with 5 courses, &c.

Joseph Kerrier, of Salem, rheumatism in his shoulders and arms—cured in 2 courses, &c.

Sarah Town, of Andover, indigestion, severe pains throughout the system, and piles—cured with 3 courses, &c.

Mrs. Lucinda Kerr, Sea street, Boston, salt rheum; top of the head one entire sebaceous—cured in 4 courses, &c.

A. W. cannot be the expense to enumerate more cases, at present. He has not named cases of fevers, they are almost too numerous to name of a physician acquainted with his practice of the *Therapeutic* fever, is unknown in the practice of such. Delicacy will not permit the naming of several diseases, which he has treated with uniform success. In almost all the cases of diseases which have been treated by him, he has been under the necessity to expel not only the disease, but the poisons which produced and continued them—and all with INNOCENT and HARMLESS SIMPLIES.

This practice induces him to believe he is not too bold in saying, the Thomsonian treatment removes both disease and poisons from the Human System, when resorted to in reasonable time.

For Medicine, Family Rights to use the same, ROBINSON'S Lectures, &c. at the usual prices, apply as above, of

Agent for Dr. SAM'L THOMSON.

**D. R. WARNER'S PURIFYING VEGETABLE POWDER FOR FAMILY BITTERS**—yielding its strength to Wine or water.

As a security against counterfeits, the label will be signed by the wholesale agent, PAKER BARNES. Likewise the steel plate will be observed, as there is a spurious article, which has been offered to the public.

In the spring of the year, every one is troubled more or less with a propensity to sleep, and by the use of this corrective is relieved entirely. For purifying and erasing all kinds of humors from the blood, even if they appear externally in the face, or in the parts of the body, it is much better and more efficacious than any external application: in fact I seldom knew it to fail proving effectual. The powder will find it operates more in the blood than any other preparation, even referred to it; it is far better than salts, sulphur, cream tartar, or any other preparation of this kind, for when the blood is once purified with this corrective, it remains in an even temperature through the summer months. For a foul stomach, jaundice, general debility, weakness of limbs, want of appetite, bilious and liver complaints, headache, stupor, &c. For the catarrh, which is generally occasioned by the impure state of the blood, there is nothing extant that has proved so efficacious as this purifying corrective. For all the above complaints it is known to fall in proving an effectual remedy.

It is really worth the public attention, as every one is aware of the unpleasant, dull, heavy feeling, which the spring of the year produces; and by the use of this corrective, it can be obviated entirely. Every one who makes use of the above preparation, will be astonished at the mild and gentle effect it has.

**CERTIFICATES.**

This is to certify, that I have been troubled in the spring and summer seasons with a dull and stupid feeling, which much troubled me while about my business, and by taking some of Warner's Purifying Powders, I have found it a perfect remedy, and with confidence recommend it to others who may be similarly affected.

ELIAS PIKE.

For Joseph Moore, of Boston, certifies that he has taken Warner's Purifying Powder for purifying the blood, and curing of Jaundice, and likewise for curing the propensity to sleep, and has found it an effectual remedy.

April 1st, 1832.

I hereby certify that I have taken Warner's Vegetable Purifying Powders for the cure of the jaundice, and removing the propensity for sleep which I am always troubled with in the spring of the year. From the benefit which I have received for the above complaints, I cordially recommend it to all that may be similarly affected.

JOHN B. FINN.

Feeling grateful for the benefit which I have received from taking Dr Warner's Vegetable Bitters, for the cure of the jaundice, weakness of the limbs, want of appetite, indigestion, &c. do recommend it as a safe and efficacious remedy for the above complaints.

BOSTON, March 1, 1833.

Other reference to its efficacy may be had by calling on the agent. To be had at whosever shop my solicitors in this city, PARKER BARNES, No 424 Washington street, and retained by all the principal Druggists, in Boston and vicinity, altho' not in this town.

Also hereby certify that I have taken Warner's Vegetable Purifying Powders for the cure of the jaundice, and removing the propensity for sleep which I am always troubled with in the spring of the year. From the benefit which I have received for the above complaints, I cordially recommend it to all that may be similarly affected.

P. COFFIN.

It is to certify, that one of the above described Double Scales, which I purchased of the Messrs. S. A. & W. G. Pierce on the 22d day of November last, in the building west of two stories, wooden, and large. The Scale weighs 100 lbs, and the second story into the cellar, and was exposed to an intense heat for nearly three hours. It was for a long time literally red hot. It contained all the account books, notes, and court papers, that were in my office; and no paper was in the least degree burnt or rendered illegible. JOHN S. ABBOTT.

Thomaston, January 8th, 1834.

The cold and dampness of the papers which were in it at the time of the fire, are more than the Agent's store, corner of Elm and Washington streets, and any individual corporation, or shop, are about purchasing Iron Safes for the protection of their money and papers, will find it to their advantage to call and examine them, and they will be perfectly satisfied that Gaynor's Double Safes are what they are represented to be—FIRE PROOF! and they will be still further satisfied that none other but the Double Safe would stand a severe fire.

Gaynor's Double Safes are a Patent article, and can only be legally purchased in this city of S. A. & W. G. PIERCE, who are his authorized Agents.

**IRON SAFES.**—S. A. & W. G. PIERCE, Agents for selling Gaynor's Patent Double Fire Proof wrought Iron Chests and Safes, 370 Washington-street, have now on hand a large assortment, comprising all the sizes and kinds which are calculated for the use of Banks, Insurance Offices, Town Records, merchants, and others.

The safes are double throughout in all their parts, with doors, each secured with Chubb's Patent Detector Lock, which cannot be picked, and the Chests are as completely Fire Proof as any ever can be made. Proof of which can be given by those who will take the trouble to call at the Agent's Store and examine a Double Chest which has passed through a very severe fire, and preserved a valuable lot of books and papers, belonging to John S. Abbott, Esq., whose name is attached to the following certificate:

"This is to certify, that one of the above described Double Scales, which I purchased in this town, when the office was burned on the 22d day of November last, in the building west of two stories, wooden, and large. The Scale weighs 100 lbs, and the second story into the cellar, and was exposed to an intense heat for nearly three hours. It was for a long time literally red hot. It contained all the account books, notes, and court papers, that were in my office; and no paper was in the least degree burnt or rendered illegible."

**ELECTRICAL MACHINES AND GALVANIC BATTERIES**—Manufactured at No 54 Cornhill, Boston. The undersigned has on hand a large number of small and Cylinder Electrical Machines, of various sizes and prices, from 15 to \$300, including medical apparatus. Also, Galvanic Batteries or single Troughs constructed on the plan of Prof. Hare (the one most approved) where the two surfaces of the zinc plates are exposed to the acid in copper cases. He has just completed a superb Plate Electrical Machine, nearly 3 feet diameter; and a large Galvanic Battery, of 300 surfaces of zinc, worthy the attention of those who purchase for public institutions. The whole of which he warrants to be made of the best materials, and of superior power. As he has an authorized Agent for the sale of his Machines or apparatus, he therefore can, and is determined to sell, when the articles are of equal quality, ten per cent less than they can be bought for at stores where they are usually deposited for sale on commission, and a liberal credit will be given to those who require it. Gentlemen Teachers, and those connected with seminaries, respectively invited to call at his room and view his apparatus before purchasing. Directions respecting lightning conductors can also be obtained. WM KING.

#### PATENT FOR THE U. STATES.—Mott's Patent

his Medicine, and Champhoo Baths, and Systematic Vegeta-

bility. These baths are well known to the medical faculty of Europe and America, (including the West

India Islands) and with as much success as any other can,

with trifling boast of it. In the nine months' practice he has had

at the Harvard street, *Infrared*, he *has not had the misfor-*

*tune* of any disease, and the patients have been for

years in the hands of the members of the Medical Faculty, and

some of them abandoned to their (supposed) hopelessness.

As it is so well known in Boston, it is unnecessary to enter

very largely into a detail of success. The following are a few of

his patients:—

Stephen Gore, (inquire at Thomas Holland's Beach street,

Boston,) totally blind for about 5 months, one eye, nearly de-

stroyed, general debility, legs swollen and lame—appeared de-

completely changed with poisons. General health restored;

eye sight greatly improved; see to read (without glasses) in 5 courses,

and after that he could for seven years previous.

Mr. Parker, now assistant at the Intermittent, rheumatism and

dyspepsia, cured in 3 cases.

Francis Kemlo, 153 Court street, Boston, severe indigestion

and spasms, cured in 4 courses, &c.

Thomas Pierson, of Roxbury, and keeps a stall in the new

Market, Boston,) erysipelas in the face and one eye; leg very

much swollen and ulcerated from the knee to the ankle for the

last 25 years—attended by many physicians; nearly cured in

5 weeks.

Miss Charlotte Pierson, do. white swelling, with loss of ap-

petite, and medical treatment 5 months, and unable to walk—cured in 3 weeks.

Joseph Brown, baker, of Roxbury, rheumatic and retrocedent

gout; stomach, knees, ankles and toes greatly affected; has been

confined to bed nine weeks—cured in 4 courses, &c.

Samuel Hayes, of Weymouth, rheumatism in the back, strictures in the urinary passage, general emaciation, &c.—cured in 6 courses, &c.

Miss A. Brown, his daughter, scrofula or king's evil, cured with 4 courses, &c.

Dr. M. will person superintend the various Baths, and attend to the prescriptions of the Medical Gentlemen in behalf of

to their patients.

Without boasting of the cures that have been performed, or

pretending to any wonderful knowledge, he would merely say,

it is the oldest establishment of the kind in the State.—Mr. B.

having followed the business for more than twenty years—dur-

ing half of which time Mr. Foster has been making Trusses,

Beath's plan, and others of approved kinds. Although not fol-

sowed it steadily and exclusively, he has made them for him

for 15 years past, and for individuals who he is at liberty to re-

fer to. Mr. F. having been severely afflicted with the disease

himself, since the age of 12 years, considers himself as possess-

ing a thorough knowledge of the business. All Trusses made

and sold by him will be guaranteed to keep the protruded parts

within the cavity of the abdomen.

Among the variety of Trusses made by Mr. Foster, are *Patent*

*Elastic Spring Trusses*, with *Spring Pad* & *Frame*.

Steel springs; these give relief in all cases of rupture, and in a
